EDUCATION

University of Sargodha, Pakistan

April 2021 – May 2025

Bachelor of Science in Computer Science - 3.65/4.00

SKILLS

Frontend Development : React.js | Redux ToolKit | Flutter & Dart | Google Maps Integration | FCM Push Notifications | MVVM Architecture | Bloc & Provider State Management

Backend Development : Python | Django | Django REST Framework (DRF) | FastAPI | RESTful API Design | Authentication & Authorization | WebSockets | Payment Gateway | ORM & Query Optimization | Celery (Background Tasks) | Redis, RabbitMQ (Caching & Queues) | Firebase

Databases : MySQL | PostgreSQL | Database Design & Optimization | Hive | SQLite

Cloud & DevOps : AWS (IAM, S3, EC2, RDS, SQS) | Docker | Linux

Tools & Version Control: Android Studio | Postman | Pycharm | Git & GitHub

WORK EXPERIENCES

Dark Bytes – Associate Software Engineer

Jan 2026 – Present

Developed scalable backend systems using Python, Django, and FastAPI, building secure RESTful APIs and integrating AWS services, Firebase, and payment gateways while optimizing database performance. Built responsive, high-performance frontend applications using React.js, delivering seamless and user-friendly web experiences.

IT Genesis – Associate Software Engineer

Jan 2025 – Dec 2025

Developed scalable backend systems using Python and Django, and cross-platform mobile applications with Flutter. Built RESTful APIs, integrated Firebase services, and collaborated with cross-functional teams to deliver high-quality software solutions. Passionate about writing clean, maintainable code and solving real-world problems.

PROJECTS

Trading Platform – Real-Time Trading Application [🔗](#)

Built a trading platform using React.js and Django REST Framework with real-time market data and secure user authentication. Implemented scalable APIs and optimized backend performance for reliable transaction handling.

Bonope POS – Point of Sale Management System [🔗](#)

Developed a POS system with Flutter and Django to manage sales, inventory, billing, and customer records. Designed efficient backend services with secure authentication and optimized database operations.

Live Chat System – Real-Time Messaging Platform [🔗](#)

Built a real-time chat application using Django, WebSockets, and React.js, enabling instant messaging and live communication. Focused on low-latency messaging, secure authentication, and scalable backend architecture.

Enterprise CRM – Customer Relationship Management System [🔗](#)

Built an enterprise CRM using React.js, Django, and PostgreSQL to manage customers, sales pipelines, and business workflows. Designed scalable REST APIs, role-based authentication, and optimized database performance for enterprise use.

Financial Tracker – Personal Finance Management App

Created a finance tracking application using React.js and Django, allowing users to manage income, expenses, budgets, and financial insights. Focused on secure data management, analytics, and intuitive user experience.

Match Connect – Social Networking & Matchmaking App

Developed a Flutter-based networking application with Django backend, featuring user profiles, real-time messaging, and intelligent matching. Implemented secure authentication, scalable APIs, and responsive user experience.

eHomes – Mobile E-commerce Platform

Developed a full-stack E-commerce application using Flutter and Django, featuring product browsing, user authentication, cart management, and secure order processing. Optimized performance with efficient API design and database management.

ThinkMatte – Medical Learning & Education Platform

Built a Flutter-based educational app with a Django backend, providing structured learning content, secure authentication, and seamless REST API integration. Focused on responsive UI, offline support, and scalable backend architecture.
